The bar chart displays the daily count of samples collected. The x-axis, labeled 'Sample Collection Date', spans from 12/3/2020 to 1/20/2021. The y-axis, representing the number of samples, has major gridlines at 0, 1,000, and 2,000. Most dates show very low sample counts, with a few small peaks around 100-200 samples. A massive spike occurs on 1/20/2021, with the bar height exceeding the 2,000 mark on the y-axis.

Notes

Please note the following several items as they relate to the dashboard:

1. Source data have been acquired through a collaborative process with strict protections on confidentiality through data use agreements and governance consistent with patient consents and applicable privacy laws. The following parties contributed data and agreed to provisions to protect patient confidential information: Clinical Reference Laboratory, Lawrence-Douglas County Public Health, LMH Health, Watkins Health Services, The University of Kansas Health System.

2. At times, testing results may be delayed from the collection date, particularly the most recent days, due to lab turnaround time. Data presented seek to balance data recency to measure demands and capacity with an accurate picture of the positivity rate. Each of multiple sources provide data in slightly different manner.

3. Data Sources

-All COVID-19 Testing: the data for this section of the dashboard is provided by Clinical Reference Laboratory (CRL), Watkins Health Services/ The University of Kansas, and The University of Kansas Health System. The testing from all sources are combined and grouped into four segments: Lawrence Student, Lawrence\Faculty/Staff, and Edwards Student and Faculty/Staff.

-Entry & Prevalence Testing: the data for this section of the dashboard is provided from saliva testing performed by CRL. It is combined and grouped into four segments: Athletics, Lawrence Student Lawrence Faculty/Staff, and Edwards Student and faculty/Staff.

-Watkins Symptomatic Testing: the data for this section of the dashboard is provided by Watkins Health Services. Data included in this section are clinic visits, all swab orders and positive cases. There may be a delay between swab order date and results date given send out lab turnaround time.

-COVID-19 Housing volumes and call volumes data are provided by KU Lawrence housing and call center sources. On campus housing students can choose to isolate and quarantine at home or on-campus.

On Campus Housing Volume- Housing numbers are point-in-time data for the reported date and location. A student will be reported each date that they are in quarantine/ isolation, and are removed from the counts once finished with their quarantine/isolation and return to their original room assignment and activity.
